# Strawberry Fields Buffer Enhancement

## Adopt A Stream Foundation

### Q2 2019 14.2

09/16/2019-02/29/2020

#### Project Description:

Strawberry Fields Buffer Enhancement Project will improve water quality in Quilceda Creek by establishing a minimum of 100-foot wide buffers along 2,622 linear feet of Middle Fork Quilceda Creek. This project includes the removal of invasive vegetation and the restoration of native riparian vegetation to approximately 5.8 acres within the Strawberries Field for Rover Athletic fields and Dog Park owned by the City of Marysville.

Volunteer Planting Event

Vast field of reed canary grass getting mowed

#### Project Accomplishments:

AASF treated and removed invasive vegetation within the 5.8 acre planting area of which was mostly reed canary grass and bittersweet nightshade. Treatment included brush cutting and mowing. After the initial control of invasive vegetation the site was planted with native vegetation: 200 potted, and 300 live stakes. A total of 1,734 additional native plants were purchased for planting in spring of 2020.

Project partners include: The City of Marysville, Marysville School District, Project SeaWolf, Cub Scout, Evergreen Fellowship, Seattle Events and Adventures, 4-H, LDS Church, Girl Scouts, Evergreen Church, SoundAir, Rose Foundation, WDFW, Forterra, and The Nature Conservancy.
