### Organization's General Goals:

The Marysville Community Food Bank receives over 80,000 pounds of usable product every month from individuals, food drives, and local grocery stores. This translates into \$138,000 of value that we distribute to about 1,100 families each month. More than 100 volunteers, along with community sponsors, work hard to provide food to the hungry and homeless in our community.

Dear Marilyn and Members of Tulalip Tribes Charitable Contributions,

Your donation of [REDACTED] to the Marysville Community Food Bank last November certainly had a huge impact on our community.

[REDACTED] of these funds were for our Food For Thought program. This school year the program provided 17,847 bags of weekend foods to students giving these underserved children a greater opportunity to succeed in school. The funds you provided helped us source the 157,210 pounds of food required to serve these children.

[REDACTED] of these funds were used to purchase foods to help our families with basic needs. We purchased turkeys and many holiday foods for Thanksgiving and Christmas serving 1,152 families with special holiday groceries. We purchased milk to give out during November and December. And, we purchased some nonperishable foods that helped to stock our shelves for the new year. This food assisted us in weathering the later shock wave that hit us as a result of the COVID-19 situation when within a week we saw a doubling in the number of families needing assistance.

We deeply appreciate your support of the many families, new and familiar, who depend on the Food Bank to ward off hunger. Thank you for helping us help them.

Many regards,

Dell Deierling, Director
