### SPECIFIC USE FOR THIS AWARD:

Please see attached photos of the Ultrasound Machine that was purchased with the grant money that you gifted to Safe Harbor Free Clinic. This machine has been invaluable in the diagnosis of gall bladder disease, pelvic and bladder cancers, Deep Vein Thrombosis or blood clots, etc. Without this machine we have had to try to refer patients to a diagnostic imaging center at their cost. If they followed through and had the testing done it amounted to a cost of up in the \$800 range. This is for patients that have difficulty accessing care and have had to resort to coming to a free clinic. Most of the patients did not follow up due to cost and thus we were not able to diagnose and treat appropriately. Thank you so much for this amazing gift. This will impacted the lives of so many people in the community. We saw 1686 patients last year and many of those patients could have utilized this machine to diagnose and treat many ailments.
