Tulalip Charitable Contributions Funds Distribution Report

NAME OF AGENCY: Schools Out Washington

ADDRESS: 801 23rd Ave S Ste A., Seattle, WA 98144

CONTACT: (206) 323-2396; <http://www.schoolsoutwashington.org>

GENERAL GOALS: Our mission is to foster productive partnerships that create inspiring opportunities for Washington's youth to learn, grow and thrive, because what's good for our youth is good for our future.

SPECIFIC USE FOR THIS AWARD:

This award went to operational support for the "Feed Your Brain" program.

For more information please see the attached report from Schools Out Washington.

95% of students either maintaining or improving by at least one grade level in reading. Children taking the alphabet test increased their ability to read both lower and upper case letters by 97%. The evaluation data combined with narrative reports demonstrate that the Feed Your Brain project plays an instrumental role in funneling needed resources into rural communities that ultimately help kids return to school in the fall ready to learn.

“The fact that students didn’t want the program to end was the biggest kudo. Secondly our summer program could almost be certified “worksheet free”. Virtually all foundational skills practice is done through games.” - Gess Elementary/Chewelah School District, Chewelah

“One student was so excited to work through the alphabet that he would arrive each day and proudly and excitedly announce what letter the group was on that day”– Jefferson County YMCA, Pt. Townsend, Quilcene, Brinnon, and Chimacum.

Summer Meals

The Feed Your Brain project also aims to address hunger in high-poverty rural communities of our state by requiring all grantees to run the Summer Feeding Service Program through USDA. Children and youth in the 10 funded communities had access to at least 2 free meals 4 days/week for a minimum of 4 weeks that programs were required to operate. The 10 programs served a total of over 32,880 meals over the entire summer. This is great news that programs are reaching youth not only in their literacy summer program but also in the community. Partially through the efforts of the Jefferson County YMCA program spreading to five locations we were able to increase the number of meals served in 2015 by 10,000.

For the past several years, School’s Out Washington has participated as a member of a statewide summer meals workgroup. Through this partnership led by the Children’s Alliance, School’s Out Washington has worked beyond the Feed Your Brain project to increase access to and participation in the summer meal program. Members of the workgroup have also served as resources for outreach and targeted recruitment of Feed Your Brain grant applicants.

Training & Technical Assistance

We again partnered with Page Ahead, a Washington State non-profit organization that provides new books and develops reading activities that empower at-risk children. Page Ahead provided each Feed Your Brain program with four new books per student served that were age-appropriate and available in Spanish as requested by the program. The Feed Your Brain programs were incredibly grateful for the books, to which they attributed much of the academic success and enjoyment of reading experienced by students.

“A big change I noticed is how into books our kids got. Receiving the books from Page Ahead really helped to change some of the kids from readers to book lovers. Books were going home and being brought back and the kids were really enjoying reading at school and at home.” Grand Coulee Dam SHARP Kids Summer Program, Coulee Dam

For the third year we contracted with Page Ahead to provide additional technical assistance through a Summer Reading Specialist focused on lesson planning and curriculum development for the literacy programming. We selected Children’s Home Society in Walla Walla, Ocosta School District and Foundation for Academic Endeavors in Mt. Vernon to participate in this enhanced technical assistance based on their Feed Your Brain grant application and an identified need for assistance with developing and implementing a literacy-based curriculum for the summer.

Community Partnerships

Every year, we encourage Feed Your Brain programs to foster partnerships to bring in additional resources and support programs. This year, Feed Your Brain programs established 86 local partnerships with a variety of community resources including local libraries, food banks, parks and recreation, colleges/universities, newspapers, state and national park service, local government, businesses, sports teams, and a wide array of other community support.

“Examples of partnerships include housing the program on the Skagit Valley college campus. The t-shirts worn by staff and children included a phrase coined by our Latino college interns, ‘Aprende en tu Colegio’ which means ‘Come and learn in your college’. This innovation builds bridges between children, families and the college.....” - *Foundation for Academic Endeavors, Skagit Valley*
