Tulalip Charitable Contributions Funds Distribution Report

NAME OF AGENCY: Sightline Institute

DATE OF AWARD: 2016 Q4

ADDRESS: 1402 Third Ave., Suite 500, Seattle, WA 98101

CONTACT: (206)447-1880, <https://www.sightline.org>

GENERAL GOALS: Sightline Institute's mission is to make the Northwest a global model of sustainability—strong communities, a green economy, and a healthy environment.

SPECIFIC USE FOR THIS AWARD:

This award went to supporting programs and operational expenses.

For more information please read the attached report from Sightline Institute.

Final Report:

2017 Tulalip Tribes Charitable Contributions Fund Grant (Q4 2016 14.2)

Organization Name: Sightline Institute

Mailing Address: 1402 Third Ave. Suite 500, Seattle, WA 98101

Phone/website: (206) 447-1180 / www.sightline.org

Contact: Eric de Place
Policy Director
eric@sightline.org

Grant Amount & Award Date: [REDACTED] – March 15, 2017

Project Title: ***The Thin Green Line: Preventing Northwest Fossil Fuel Exports***
www.sightline.org/research/thin-green-line

Total Number of Individuals Impacted: > 400,000 (*Sightline’s work aims to benefit all communities in the Pacific Northwest. The exact number of people is difficult to calculate, as we are not a direct service organization. Sightline currently reaches over 408,000 individuals through our website alone, and over 59,000 receive our emails or follow our work through social media. Our project work on coal exports and crude oil-by-rail is also used by the Power Past Coal and Stand Up to Oil campaigns and other allies to reach their own audiences. Sightline also serves to support a large network of organizations and individuals working on the long-term health of our region, helping to maximize our combined impact.*)

Project Report:

In 2017, the Charitable Contributions Fund Grant from the Tulalip Tribes continued to support in-depth research and analysis of new proposals for large-scale fossil-fuel projects in the Northwest. Our work in collaboration with Northwest Tribes and First Nations continues to deepen, including participation in the Coast Salish Gathering and Lummi Totem Pole Journey and research support in opposition to the Dakota Access and Trans Mountain Pipelines.

At a time when climate change poses increasingly dire threats to communities around the world—including here at home—the work to eliminate the regional threat posed by fossil fuel exports counts as among the most vital environmental and social justice priorities in the Pacific Northwest. In partnership with Climate Solutions, STAND.earth, the Lummi Nation, the Quinault Indian Nation, the Tulalip Tribes! - and others, we have been able to leverage our reputation and deepen our impact. Funding from the TTCC Fund in 2017 has helped us hold the Thin Green Line strong. Articles and reports that we have produced over the past year that have bolstered the case against fossil fuel projects include:

Northwest Coal Exports: The End Is Nigh

Fierce public opposition and financial disarray sank the coal industry's export ambitions.
