## TULALIP GRANT REPORT

### Q4 2015 14.2

The Snohomish Medical Reserve Corps again thanks Tulalip Tribes for their generous support of the MRC program. The funds that Tulalip Tribes granted to the MRC in 2016 were used through 2019. This report outlines the projects, trainings and emergency responses that these funds supported. For more information about the MRC, please contact Therese Quinn at [TQuinn@SNOHD.org](mailto:TQuinn@SNOHD.org) or visit our webpage at <https://www.snohd.org/221/Medical-Reserve-Corps>.

Between 2016 and through 2019, the Snohomish MRC has conducted over 100 classroom trainings including MRC Orientations, shelter training, first aid/CPR, Cultural Competence, Risk Communication, Psychological First Aid, Activation Training, Points of Dispensing and more.

Volunteers learn about providing emergency medication to the community

**All of these trainings prepared volunteers to participate in training exercise. Some of the exercises were formal functional and full-scale exercise:**

MRC Volunteers role play in a Disaster Exercise at Providence Colby Campus

## Functional Exercises

- Points of Dispensing exercise with Skagit County
- Shakeout exercise with Community Health Center and Providence
- Paine Field Mass Casualty Drill
- Reliant Cloud Exercise
- Healthcare Coalition tabletop Exercise
- Cascadia Rising Exercise

Other exercises were also volunteer opportunities to give back to community, including staffing over 30 first aid stations. MRC Volunteers provided health screenings at health fairs to over 800 individuals. MRC Volunteers also participated in the Amen! Free Clinic and staffed the lost person station at the Evergreen State Fair.

MRC Volunteers provide health screenings at Care Day

MRC Volunteers staffed medical stations at Tri-Monroe

Through a partnership with the Everett Housing Authority, MRC Volunteers provide health and safety assessments to residents in the public housing community on a weekly basis – the Community Health Risk Reduction Project (CHRRP).

MRC Volunteers at Bakerview for Community Health Risk Reduction Program

MRC Volunteers staffed cold weather shelters in Snohomish and Monroe serving nearly 200 unduplicated guests in a season.

The trainings also prepared volunteers to respond to public health emergencies here in Snohomish County as well as with partners in Washington State.

- Measles outbreak in Clark County
- Winter sheltering in Everett
- Norovirus outbreak

MRC nurses respond to measles outbreak in Clark County, Washington

In conclusion, the MRC program has directly impacted people through trainings (200), medical services (1000), cold weather shelters (200 per season) and projects like the lost person station (over 100) and CHRRP (100). However, the cumulative work that the MRC Volunteers have done has helped all of Snohomish County be more resilient and prepared for a disaster.

The funds from Tulalip Tribes allowed the MRC to offer refreshments to volunteers at 15 of the trainings listed below, making it more convenient for volunteers to attend. A total of 193 volunteers attended these trainings.
